## Blended Learning: Is this the new model of education methodology? #BSBIDialogues

Berlin School of Business and Innovation

As we experience the impact of the 4th industrial revolution, it has become apparent that education is also affected, and new norms and methods have emerged. In this framework, “Blended Learning” appears to be one of the most dynamic models of education not only for the future, but also currently.

Therefore, it is useful to explore the definitions and elements of Blended Learning, examine it in comparison to conventional learning, comment on the benefits and challenges that this model brings and also assess its implications on the future of global education. The topics covered in this webinar included: • What is “Blended Learning?” • Blended Learning vs conventional learning • The benefits and challenges of Blended Learning • The future of global education

## **Click here-- blended learning and the future of education: Monique Markoff at TEDxIthacaCollege**

TEDx Talks

This talk was given at a local TEDx event, produced independently of the TED Conferences. Blended Learning has become a catch phrase-- a buzzword for using technology in the classroom. The idea is used to describe the education system's response to the need for 21st century skills, a solution to the budget crisis in schools, and a beacon of hope for the transformation of education through individual interventions. In my talk I sharpen the idea of blended learning and offer some insight on potential successes and pitfalls of implementing a true blended model. Blended learning has enormous potential but it is not a panacea for the woes of education.

## **Flipped and Blended Classroom: Similarities and Differences**

Russell Stannard (Teacher Training Videos)

How do the Flipped Classroom and the Blended Classroom differ? What are the similarities? This video tutorial takes you through the principles of the flipped and blended learning and tries to compare and contrast them. It highlights that they both came from different traditions and that the blended learning has evolved more through the introduction of technology into education, while the flipped classroom focuses more on Bloom's Taxonomy. You will learn about:

The different traditions of both approaches

The learning theories that underpin both types of delivery

The similarities between both approaches A discussion on which one is easier to implement

## **Students need to lead the classroom, not teachers | Katherine Cadwell |**

### **TEDxStowe**

TEDx Talks

A classroom revolution is overdue, not only for improving learning but for the health of our democracy. In this inspirational talk Katherine Cadwell shares how after 30 years in education she completely flipped her classroom and teaching style. The Harkness method puts the focus of learning back onto the students: teaching them how to ask critical questions and the skills of civil discourse. Katherine has been a teacher at Harwood Union High School since 1981- she is a 2016 recipient of a Rowland Fellowship, the 2016 Foundation for Excellence in Education Award and the 2016 Gilder Lehrman Vermont Teacher of the Year.
